

C/C++

Table of contents

1 Gems from the past.....	2
2 Qt.....	2

A selection of my C/C++ programs, also check out my [Sourceforge projects](#).

1 Gems from the past

These are two small projects from my early years, where handmade linked-lists and circumventing the 640K memory limit of DOS were my favourite pastime. Always good for a laugh or two ;) ...

[makeindx](#)

Helper tool that creates a LaTeX keyword index for handwritten lecture notes. TurboC 3.0, works under DOS and Linux.

[sarius](#)

A simple vocabulary trainer for Russian, written in TurboC 3.0.

2 Qt

[segorkat](#)

A simple viewer for the electronic [Segor](#) catalog.
