

Sourceforge

These are my open-source projects registered at [Sourceforge](#):

[gerber2eps](#)

Converts Gerber format to EPS (Encapsulated Postscript).

[chesstask](#)

Create sets of chess tasks and output them to LaTeX or HTML.

[pgn2ltx](#)

Convert PGN (Portable Game Notation, files with chess games) to LaTeX.

[fen2eps](#)

Output nice looking chess boards in EPS from FEN files (Forsyth Edwards Notation for chess positions).

[sPYderchess](#)

A framework for analysing your chess games, written in Python.
